

Add funds to your Shark Futures wallet

AlgoPulse can only trade with money that is inside your Shark **Futures Wallet**. Money sitting in your INR Wallet is invisible to your strategy. This takes about a minute in the Shark app.

Shark Exchange mobile app · Updated Sep 2026

YOUR 2 SHARK WALLETS

INR Wallet

Rupees you deposit by UPI or IMPS land here.

Futures Wallet

The only wallet AlgoPulse trades from.

No USDT to buy. Shark's contracts are priced in USDT, but you fund and settle in rupees. Move INR straight from your INR Wallet to your Futures Wallet.

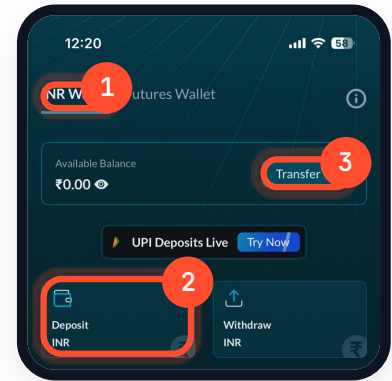

Screens from the Shark Exchange app, Sep 2026. Button names may change slightly with app updates. Crypto futures are high-risk; only trade money you can afford to lose.

Step by step

1 Deposit rupees

Funds > INR Wallet > Deposit INR

Open the **Funds** tab in the bottom bar, stay on **INR Wallet** and tap **Deposit INR**. Pay by UPI or IMPS. Deposits are instant and free, and show up under *Available Balance*.

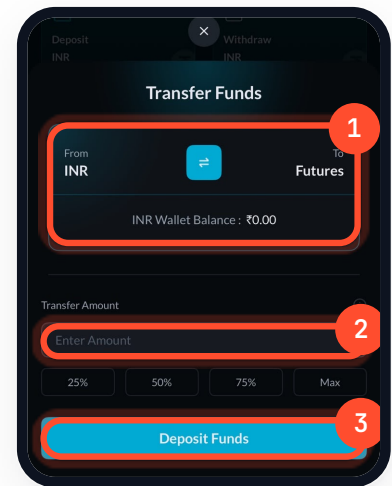

1 INR Wallet tab · 2 Deposit INR · 3 Transfer

2 Move the money to Futures

INR Wallet > Transfer > Deposit Funds

Tap **Transfer** on the INR Wallet card. The sheet should read **From INR** and **To Futures**. If it is the other way round, tap the blue swap button in the middle.

Type an amount, or tap **25%**, **50%**, **75%** or **Max**, then tap **Deposit Funds**. The money arrives straight away.

1 From INR → To Futures · 2 Amount · 3 Deposit Funds

3 Check the balance arrived

Funds > Futures Wallet

Switch to the **Futures Wallet** tab. *Total Balance* should now show what you moved. That is the money AlgoPulse can trade with.

Then deploy on AlgoPulse

Go to **AlgoPulse** → **Brokers** → **Add Broker** → **Shark Exchange** and paste an API key with **Trading** turned on and **Withdrawals** off.

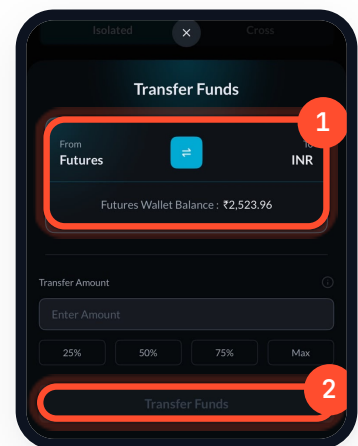

Whitelist AlgoPulse's IP, not your own. Add **80.225.249.52** in Shark's API settings. Whitelisting your own IP is the most common reason a Shark connection fails.

AlgoPulse reads Shark's minimum order sizes live and warns you in the deploy dialog if your trade would be too small.

Moving money back

On the **Futures Wallet** tab, tap **Transfer** and use the swap button so it reads **From Futures** and **To INR**. Enter the amount and tap **Transfer Funds**.

Stop your AlgoPulse strategy first. Money held as margin in an open position is locked and can't be moved until that position closes. That is why the Futures Wallet balance and the transferable balance can differ.

1 From Futures → To INR · 2
Transfer Funds

Common problems

AlgoPulse says “Insufficient funds”

Your Futures Wallet is empty, or the money is still in your INR Wallet. Repeat step 2.

The Deposit Funds button does nothing

Enter an amount first. It must be more than zero and no more than the balance shown in the sheet.

AlgoPulse can't connect to Shark

Check the API key has Trading permission, and that the whitelisted IP is 80.225.249.52, not your own.

I can't move all my money back

Margin in open positions is locked. Stop the strategy and close the positions, then transfer.
